

ATTACHMENT 9: Nueces County Hurricane Reentry Registry

To meet the intent of Attachment 7, Nueces County developed a regionally available hurricane reentry registry through the Coastal Bend Coordination and Alert Network (CBCAN) managed by the South Texas Chapter of the Alliance for Community Solutions. The registry was funded through a grant provided by the Coastal Bend Regional Advisory Council to support the timely reentry of medical professionals throughout the area.

The Nueces County Hurricane Reentry Registry was implemented in 2013 to manage Evacuation Exempt organizations and personnel being issued Tier 1 Level Essential Personnel letters under the responsibility of Nueces County Office of Emergency Management. As a security feature, the enhanced letters are issued to the specific individual pre-identified by the authorized organization representative, can be evocated in real-time and is field verifiable. The secure registry is tied to a mass notification system to alert participates of potential or imminent evacuation orders and reentry status. The system also allows for real-time secure information sharing between participating EOCs.

New for 2016 is the issuance of a vehicle placard as an attachment to the letter. The placard color and format is based on the state recommendations in the State Emergency Management Plan Responder Reentry Annex.

Ongoing efforts include the implementation of the regional responder standard identification. In future years, it is desired to remove the requirement to maintain a Tier 1 letter for personnel in possession of the regional ID. Current participants include Nueces County Emergency Services Districts, Refinery Terminal Fire Company and the Nueces County Medical Society.

For additional information, contact the Nueces County Office of Emergency Management, Coastal Bend Council of Governments or the Coastal Bend Regional Advisory Council.
